WORK EXPERIENCE:

Tenable, Inc. Columbia, MD   February 2025
Job Shadow

- Assessed security vulnerabilities and ensured cloud infrastructure protection on AWS.
- Set Up Tenable for AWS Security Monitoring: Configured Tenable.io/Tenable.sc to scan AWS cloud environments, including EC2 instances and S3 buckets.
- Conducted a Security Assessment: Used Tenable vulnerability scanning tools to identify security risks in AWS services and analyzed compliance reports.
- Reviewed and Analyzed Findings: Interpreted scan results to identify high-risk vulnerabilities, such as misconfigured IAM roles, exposed S3 buckets, or outdated software versions.
- Implemented Security Fixes: Applied best practices by updating permissions, configuring security groups, and patching vulnerabilities in AWS instances.
- Generated Reports and Documentation: Compiled findings into a detailed report with remediation steps and best practices for strengthening AWS security.

DARCARS Honda of Bowie, Bowie, MD   January 2023 – January 2025
